# About us

We are a metal hub based in Verona. Our group provides a complete range of custom services and solutions for creating products from metal for a variety of industries. We simplify processes because we act as a single point of contact for all stages of the project from engineering to logistics.

We have lots of space, modern technology and forty years of experience in the metal industry, but what sets us apart is something intangible, namely the desire to anticipate the needs of our partners by combining our experience with a customer-centric and creative approach to every project shared by all our collaborators.

What we do

Simplification: this is what we want to offer the customers who choose us and whom we choose.

## 1. Engineering

Engineering is the supreme test of experience and creativity in identifying cost-effective solutions while maintaining a focus on design.

NordLog takes a keen interest in and develops a strong link to the project at every stage, right from the design and prototyping.

A strong team, combined with speed and automation, make engineering and re-engineering the key to a tailored customer offering.

## 2. Consultancy

At NordLog, we manage any complications that may arise in your project with a winning approach of simplicity and attention to detail. The driving force behind NordLog's consultancy service is the expertise acquired in every single area of operation, leading to reliable and personalised solutions at all times.

NordLog provides an extensive array of useful tools for your project management – including analysis, engineering, goal setting, organisation of resources, definition of time frames and budgets. A dedicated project manager will provide continuous support, ensuring high quality standards are maintained while respecting the deadlines.

### 3. Metalworking

NordLog's commitment to guaranteeing high quality standards is proven by its constantly updated certifications.

UNI EN ISO 9001

UNI EN ISO 3834

UNI EN 1090

## 4. Laser cutting

Two laser cutting systems with latest-generation technology, fibre.

Laser surface 6.000x2.000 mm  
5kW th. Max FE 25 mm.

Combined laser for surface dimensions 3.000x1.500 mm 3kW th. Max FE 15 mm, for pipe diameter 120 mm, square dimensions 100x100 mm 3kW.

## 5. Forming

The sheet metal forming department has five presses with surface dimensions from 2.000 mm to 6.000 mm.

## 6. Welding

Welding is the cornerstone of every NordLog project, from the robotic island to tailored welding, thanks to the highly skilled work of our employees.

## 7. Industrial coating

NordLog's in-house industrial powder coating process is achieved through the combination of a comprehensive powder stock and three production lines, which also work in double shifts to ensure we meet all our customer requests. Customers can rely on our certifications as a guarantee of our quality processes.

QUALICOAT

QUALISTEELCOAT

The mechanical sandblasting pre-treatment is used to prepare parts for coating in all lines.

Automatic checkweigher, powder and liquid coating. Workpiece size: 8.000x2.500x2.000. Type of pre-treatment: 4-stage nano ceramic spray coating.

Automatic chain line, quick coupling. Workpiece size: 4.000x2.400x1.000. Type of chemical pre-treatment: 10-stage nano ceramic and phosphate-chromate conversion spray coating.

Automatic checkweigher. Workpiece size: 8.000x2.000x1.500. Type of chemical pre-treatment: 6-stage nano ceramic spray coating.

## 8. Assembly

NordLog's commitment to satisfying and exceeding customer expectations is also demonstrated in the assembly stage. 10 equipped assembly cells, with 15 dedicated workers:

- assembly;
- pre- and post-coating finish;
- special packaging;
- parts assembly;
- finished product assembly.

## 9. Supply Chain

- 20.000 sqm of production department;
- 10.000 sqm of warehouse space;
- 10 transport vehicles;
- 7.500 deliveries each year.

The NordLog logistics area quickly and comprehensively satisfies all customer requests: procurement of raw materials, stocking of parts, finished product management and delivery of the product to the end customer.

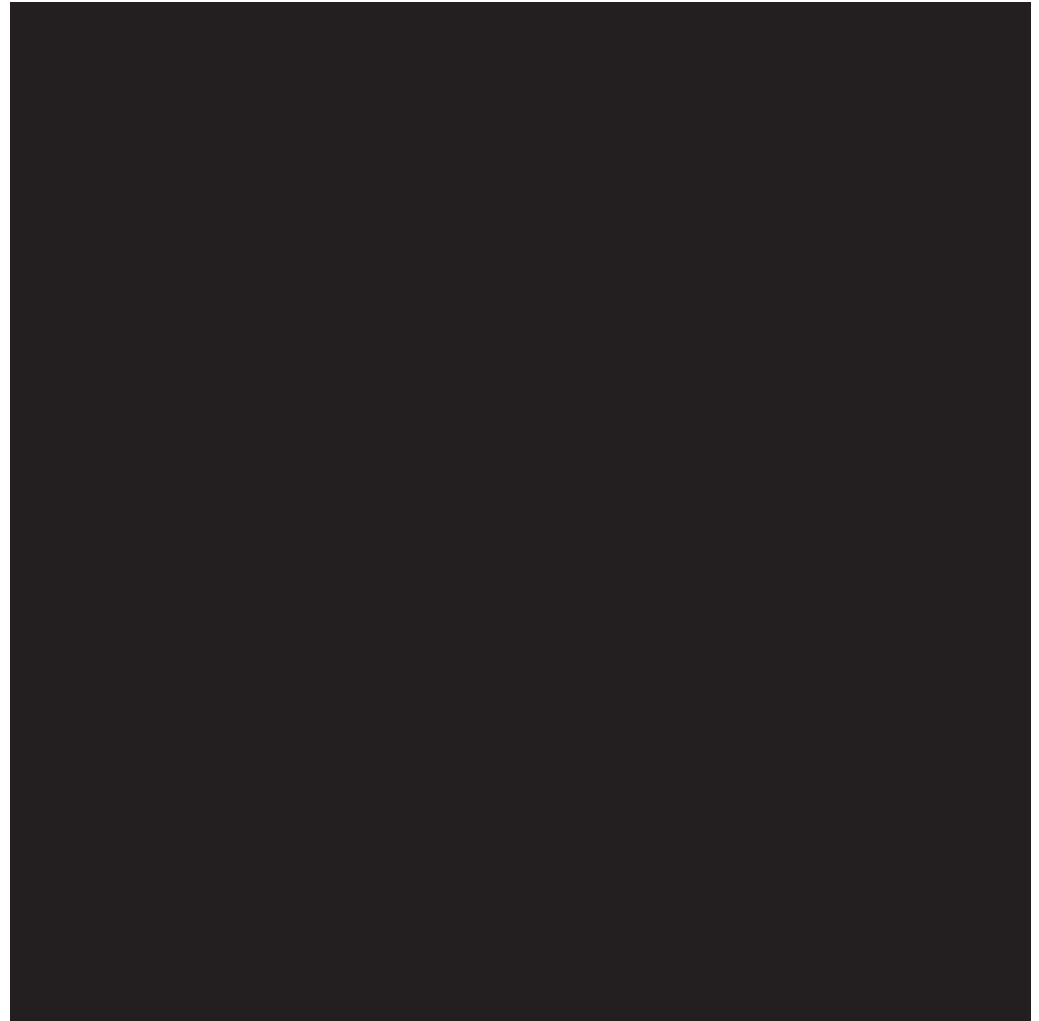

Nord, our alphabet

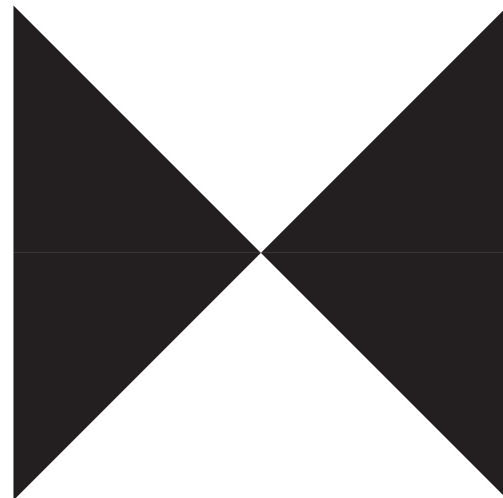

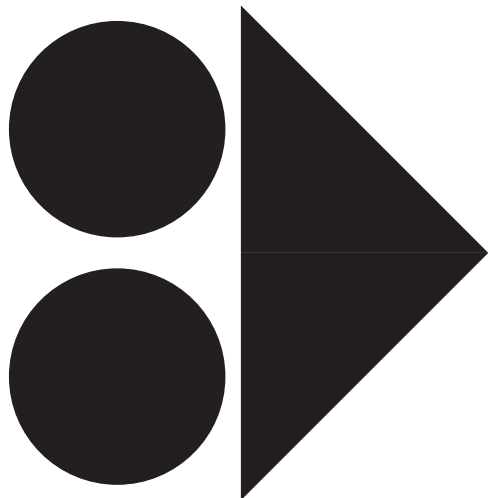

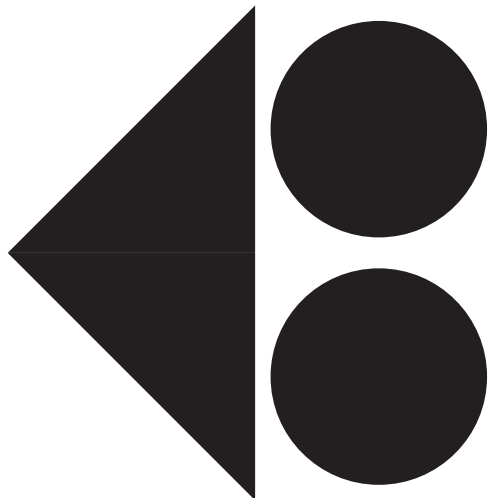

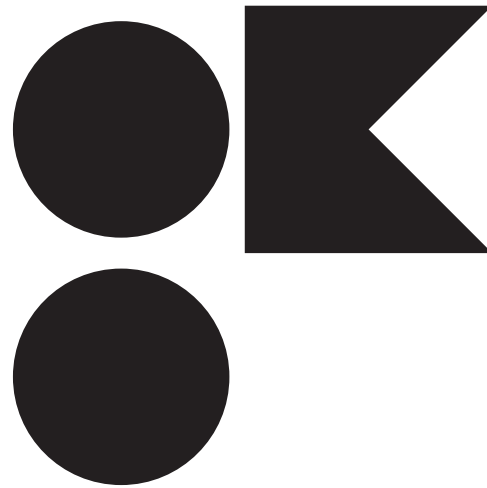

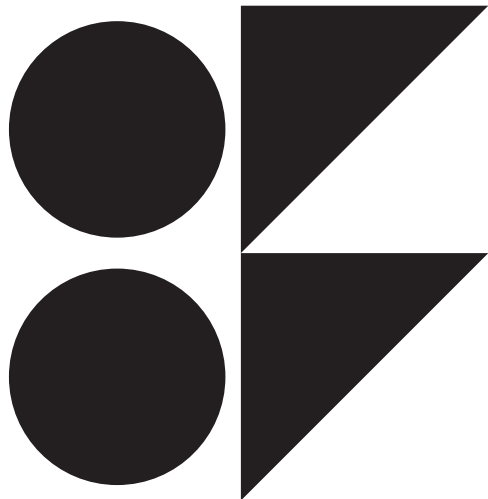

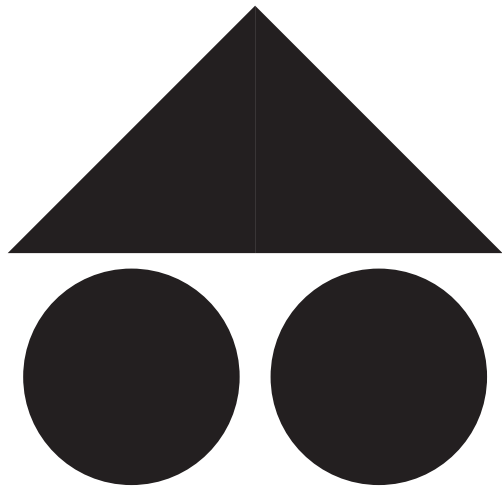

Our alphabet consists of:

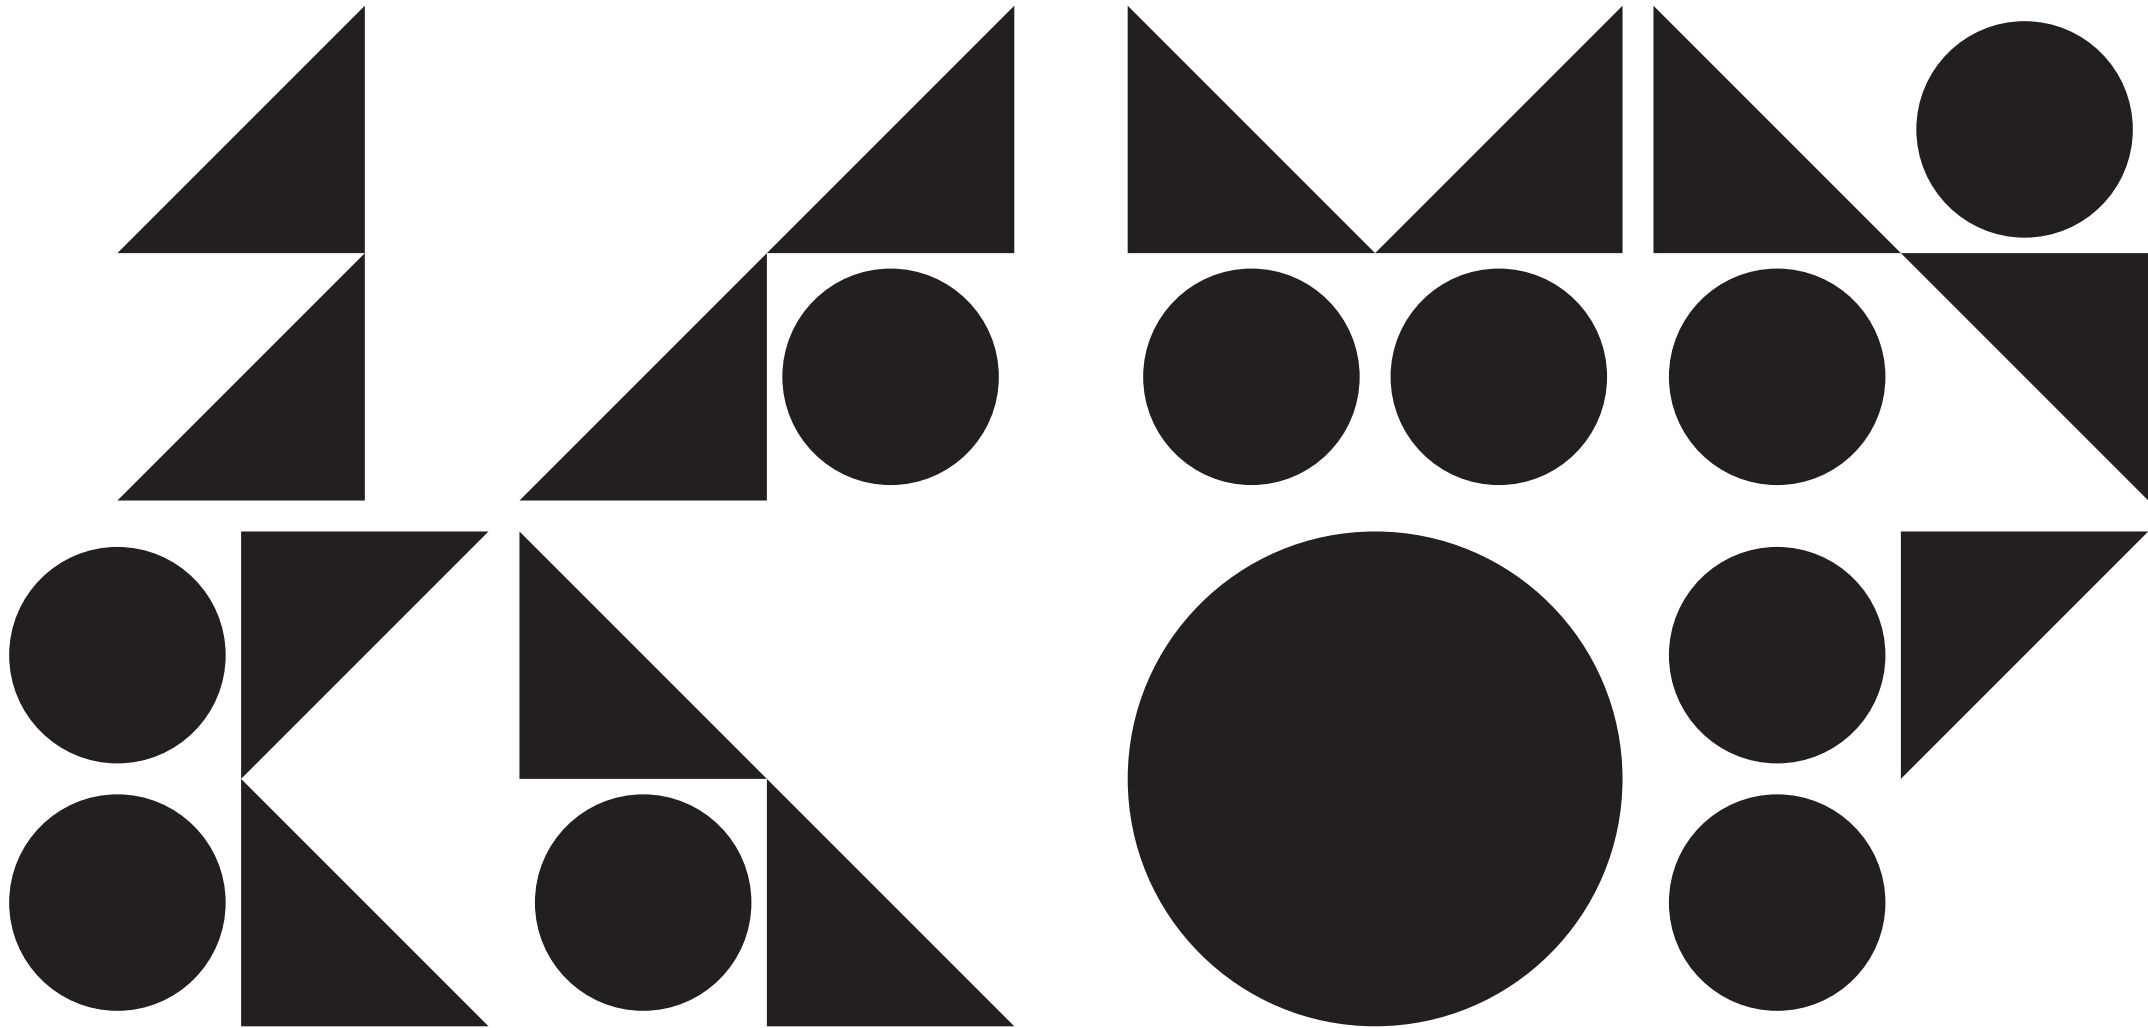

- 36 circles;
- 56 triangles.

And you can enclose it all in:

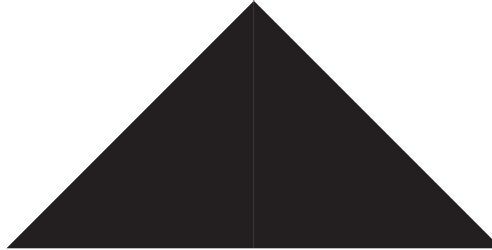

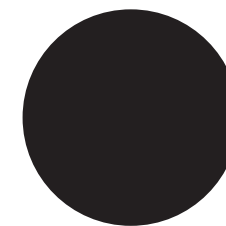

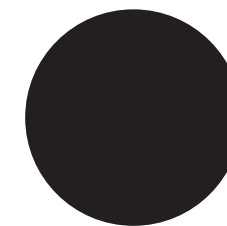

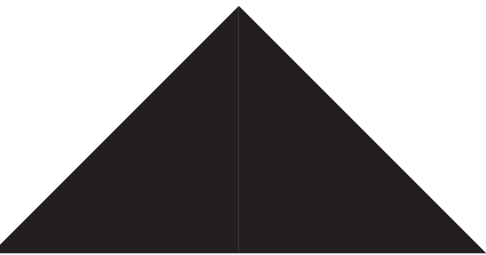

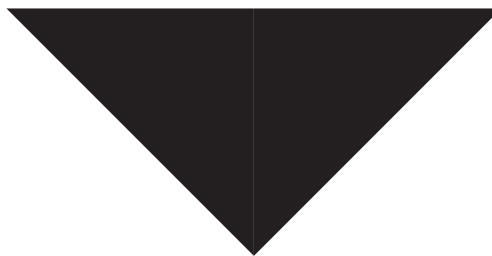

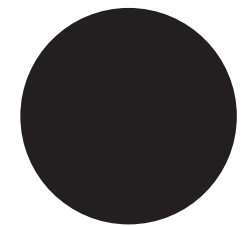

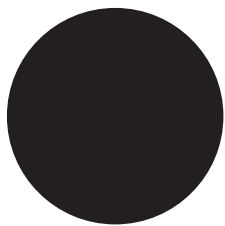

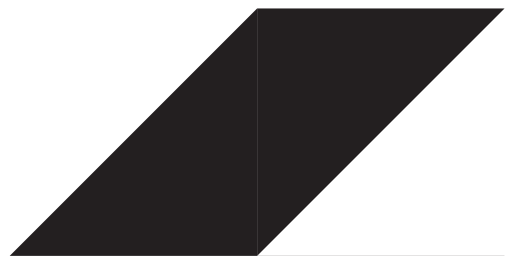

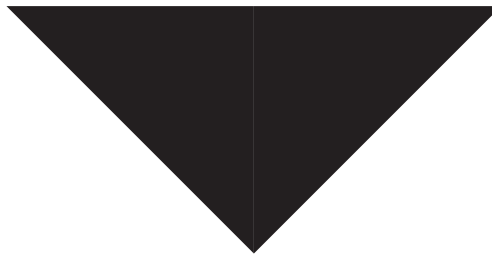

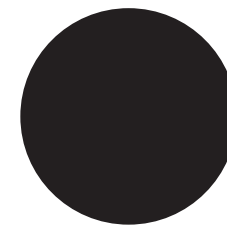

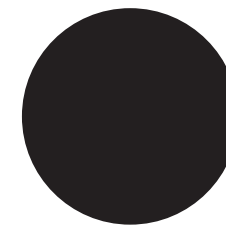

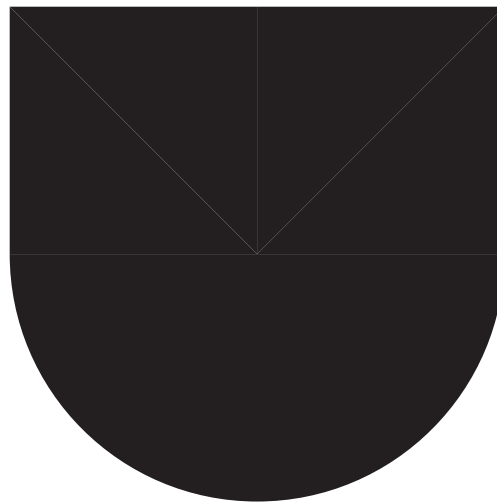

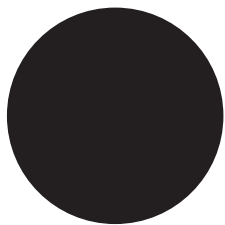

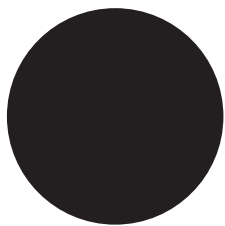

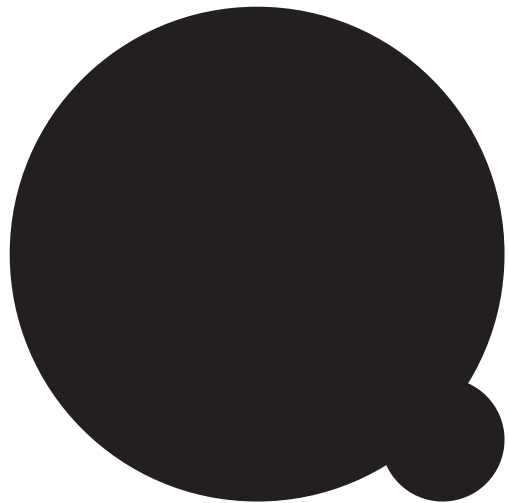

- 1 square.
